ARIELLA VU

SENIOR SOFTWARE ENGINEER

PROFILE

Senior software engineer with 10+ years of experience building products across e-commerce, CRM, fintech, and blockchain platforms. Proven track record delivering secure, high-performance features for millions of users while maintaining production stability. Expert in React, JavaScript/TypeScript ecosystems, and full-stack development with a security-first mindset. Skilled at cross-functional collaboration, mentorship, and distilling complex technical requirements into elegant, scalable solutions.

EXPERIENCE

Senior Software Engineer II — MetaMask (Consensys)

Remote | Jan 2022 – Sep 2025

- Engineered an open-source blockchain wallet serving 30M+ monthly active users
- Built reusable React/React Native components with Storybook documentation and comprehensive tests
- Architected secure UI/UX for displaying complex transaction data aligned with protocol specifications
- Deployed transaction-simulation safeguards preventing phishing attacks and unauthorized fund transfers
- Served as security liaison, triaging vulnerabilities and resolving high-impact security bugs
- Led Web Extension migration to Manifest V3 using service workers and Node.js multiplex streams
- Diagnosed and fixed critical BigNumber precision bugs, including a 7+-year defect affecting accuracy
- Created a mobile dApp testing framework to validate JSON-RPC methods with dynamic inputs
- Piloted confirmations redesign, refactoring 30+ modal views and resolving long-standing UI bugs
- Developed Ethereum smart contracts for JSON-RPC testing; contributed code and docs to EIPs
- Facilitated workshops, spoke on an industry panel, and mentored developers at hackathons
- Established 10+ strategic partnerships with external projects and companies

Senior Software Engineer — Copper CRM

San Francisco, CA & Remote | Aug 2016 – Apr 2021

- Optimized data-loading performance, cutting execution time for 10K+ items from 1,250 ms to 41 ms (97%)
- Built a custom A/B testing tool as client-side technical lead for the Ember.js application
- Delivered a Chrome extension for Gmail/Google Workspace integration, enabling direct CRM access
- Shipped AMP emails, default list filters, a credit-card detection algorithm, and other features
- Partnered with Google to launch a Workspace add-on through their Beta Program
- Integrated Google Tag Manager, Captora, and Pendo Analytics for cross-platform tracking
- Presented a Chrome DevTools tutorial on detecting and resolving memory leaks
- Led full-stack engineering discussions and won multiple internal hackathons

Software Engineer — Wayvia (formerly PriceSpider)

Irvine, CA | Feb 2015 – Jun 2016

- Launched a MEAN-stack analytics application in 4.5 months alongside one other engineer
- Designed SQL/NoSQL schemas, built the AngularJS 1.x repository, and established developer workflows
- Developed 25+ “Where to Buy” widgets using HTML, CSS, TypeScript, and JavaScript
- Implemented interactive data visualizations with jqxGrids, Highcharts, and custom HTML tables
- Led AngularJS developer meetings sharing performance techniques and best practices
- Built client access-control features supporting custom roles and granular read/write permissions
- Hardened authentication with brute-force attack prevention logic
- Authored web crawlers in C# and ASP.NET to parse store and product data from retailer sites

EDUCATION

B.A.Sc., Computer Science — University of California, Davis

Sep 2010 – Sep 2014
